

I have been on Verizon's DSL waiting list for almost 5 years now and I am getting sick and tired of waiting for broadband choices in my area. I DO NOT LIVE IN THE STICKS! I live in a city of 50,000+ people and I am located 50 miles south of Washington DC (Nations Capital) and 50 miles north of Richmond VA (State Capital). Why am forced to continually pay \$55 a month for broadband through Adelphia...the only broadband provider in town for 5+ years. This is insane! We invented broadband internet, yet we're well behind the rest of the world in this technology. Yikes!!! Please fix!!!
